

How to start (an existing ipynb file):

1. Upload the .ipynb file to your google drive.
2. Click on the file in your google drive, and open with colab.
3. You should be able to view the file contents now (or after setting up colab. Follow google instructions to setup colab if needed)

How to run the code:

1. Click on the "play" button on the left of each cell to run the code block for that cell.
2. or press "shift-enter" to run the cell after clicking on the cell contents.
3. Take note to run the cells in sequence (top down) as some variables are created in the earlier cells for use later.

How to create a new coding file

1. In an existing notebook, click on "File -> new notebook" to create a new notebook from scratch.
2. Or "File -> Save a copy in Drive" to clone the notebook to modify its contents.

How to create a new code block

1. Mouse over the bottom of an existing code block, and options will appear for creating either a new code block or a new text block for annotation.
2. Or on the top left (right below the menu bar), you should see the same code block creation button or text block creation button. This will create new blocks underneath your current highlighted block.
